

Wildlife Decline

The video has mentioned three reasons why wildlife might be declining in your area, can you choose which item you think is true for the three reasons:

1) Habitat fragmentation - Which is true, statement a or b?

- a) Habitat fragmentation is the word we use to describe something that has cut the home of living things in two or more parts making it harder for the living things to get what they need
- b) Habitat fragmentation is when a creature is divided into two parts

2) Damage to habitats - Which is true, statement a or b?

- a) Things like air pollution and litter cause damage to wildlife habitats making it harder for wildlife to live there
- b) Damage to habitats happens when there is too much wildlife

3) The loss of habitats - Which is true, statement a or b?

- a) Wildlife doesn't need help, it can live anywhere
- b) The biggest threat to wildlife is that there are less and less suitable places for wildlife to live

Wildlife Decline

Can you name some the reasons why some living things need to move around within a habitat in order to thrive?

Do you know why different habitats are important to different types of wildlife? For example, why can't badgers live in the same kinds of habitats that frogs like?
