

Parts of a Plant

Label each part of the plant:

Part A

Part B

What do the different parts of the plant do?

The roots are responsible for keeping the plant steady and absorbing _____ and _____ from the soil.

The leaves have the super ability to use _____ from the sun, _____ from the roots and _____ from the air, and turn them into food. This process is called _____.

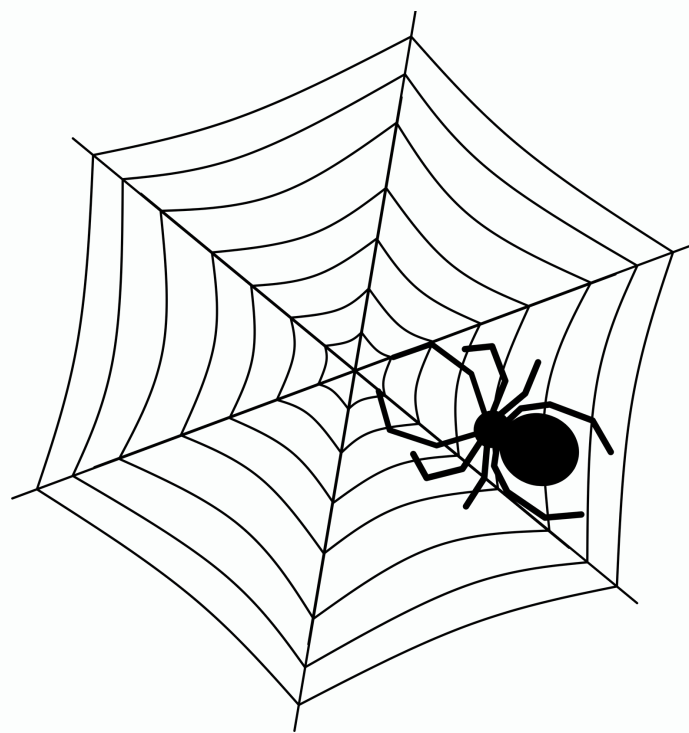

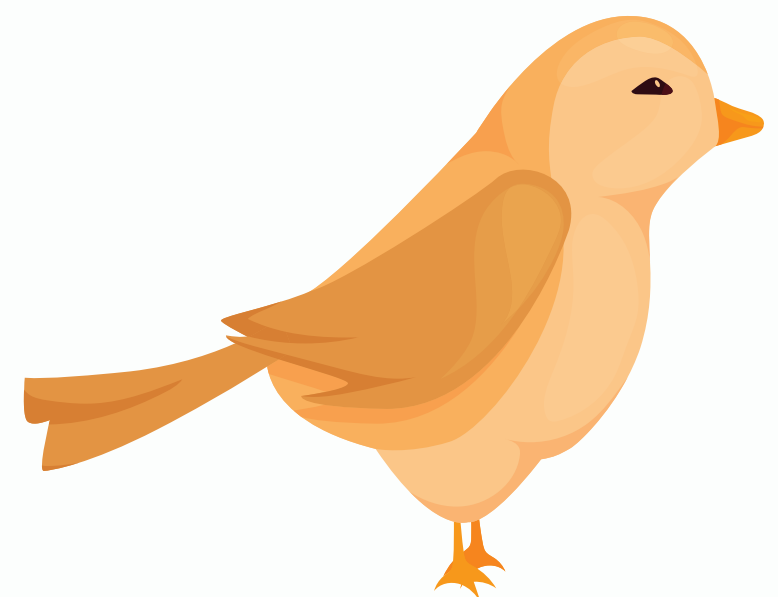

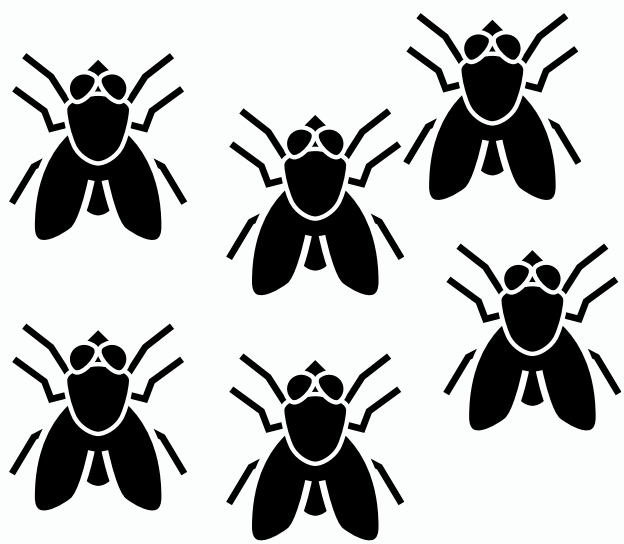

The stem connects the roots to other parts of the plant. The stem takes _____ and _____ to the leaves and flowers.

Some plants have flowers. Flowers are involved in _____ and make seeds. The seeds grow into new plants.

The role of the Cuckoo Pint in the eco system

**Starting at the Cuckoo Pint,
draw a line to show what that thing is eaten by**
